

CONTENTS OF VOLUME 38

BELLER, E., Ancient Jewish Mathematical Astronomy	51
BERGIA, S., & L. NAVARRO, Recurrences and Continuity in Einstein's Research on Radiation between 1905 and 1916	79
HALD, A., On de Moivre's Solutions of the Problem of Duration of Play 1708-1718	109
HØYRUP, J., Jordanus de Nemore, 13 th Century Mathematical Innovator: An Essay on Intellectual Context, Achievement, and Failure	307
JAMI, C., Une histoire chinoise du "nombre II"	39
KOX, A. J., Hendrik Antoon Lorentz, the Ether, and the General Theory of Relativity	67
LAIDLER, K. J., Chemical Kinetics and the Oxford College Laboratories . .	197
LAM LAY-YONG, A Chinese Genesis: Rewriting the History of Our Numeral System	101
MAEYAMA, Y., The Keplerian and Mean Motions. A Geometrical Study . .	365
NAVARRO, L., see BERGIA, S.	79
PARSHALL, K. H., America's First School of Mathematical Research: James Joseph Sylvester at The Johns Hopkins University 1876-1883 .	153
PROVERBIO, E., R. G. Boscovich's Determination of Instrumental Errors in Observation	135
SHEN KANG SHENG, Historical Development of the Chinese Remainder Theorem	285
VAN DER WAERDEN, B. L., On the Romaka-Siddhānta	1
VAN DER WAERDEN, B. L., The "Day of Brahman" in the Work of Āryabhaṭa	13
VAN DER WAERDEN, B. L., Reconstruction of a Greek Table of Chords . .	23
